

Guardian Analytics Sentinel™ is the most advanced fraud protection for enterprise B2B web portals. Sentinel uses advanced behavioral analytics and machine learning to detect and protect against multiple fraud schemes including: account takeover, business email compromise, payments fraud, and eCommerce fraud. Guardian Analytics Sentinel monitors, analyzes and calculates a real-time risk score for every online interaction and automatically quarantines high-risk payments such as EFT, Wire, ACH, or Foreign Exchange (FX) transfers while expediting the processing of low risk transactions.

KEY FEATURES

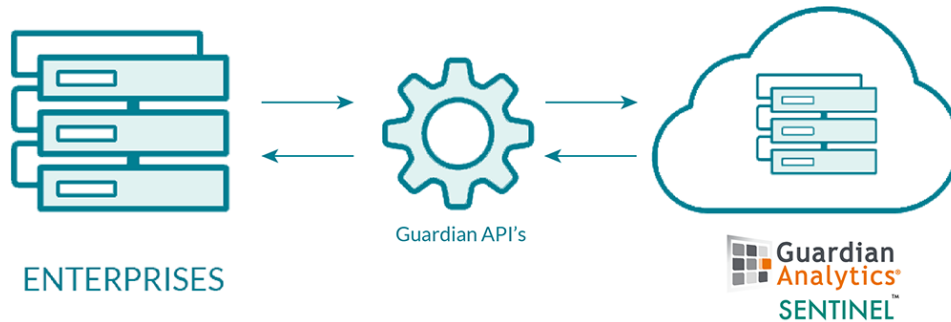

- API-enabled machine-to-machine learning
- Protects all B2B portals (internal and external)
- Analyzes all account access and transactions
- Prioritizes alerts based on risk score
- Automatic quarantine of high risk transactions
- Detects anomalous access behavior based on:
 - Device information
 - Connection
 - Geo-location
 - Time
 - Velocity
 - Transaction details

BENEFITS

- Detects fraud from account take over, fraudulent payment requests, fake invoices, session hijacking, man-in-middle/man-in-the-browser attacks, stolen credentials, and modified payment templates
- Offers the highest detection rates with low false positives
- Automatically holds high-risk transactions
- Open API offers real-time risk scoring with no manual intervention
- Quick to deploy, as fast as 60 days to integrate

PROVEN PROTECTION

With the most precise risk scoring, web services integration, alerts, and easy-to-use visual analytics, cash management and information security professionals can effectively and efficiently detect unauthorized access to secure applications such as B2B vendor portals, procurement portals, employee benefits portals, and other web-facing applications.

TRAINING AND CERTIFICATION

Guardian Analytics offers a comprehensive training and certification program designed to enable new and experienced customers to get the most out of the Guardian Analytics platform. The curriculum includes a self-paced certification program and instructor led courses for advanced users.

QUOTES FROM OUR CUSTOMERS

"Since using Guardian Analytics, we have not had any fraud losses"

"Guardian Analytics has been very effective at helping us stop fraud, saving us hundreds of thousands of dollars, as well as reputational integrity"

Guardian Analytics is the pioneer and leading provider of behavioral analytics and machine learning solutions for preventing fraud.
